## Dust Containment

Our URETHANE Eagle SkirtBoard is the solution for dust containment in bulk transfer points. Designed to have low coefficient friction that reduces drag, ESB combines a high tensile strength resulting in longer wear and less tearing compared to rubber skirtboard. The benefits extend beyond dust containment to less maintenance cost, less downtime for replacement and less overall belting and motor fatigue.

## Benefits of ESB

- ✦ Special 60A urethane compound
- ✦ Additives for lubricity
- ✦ 60% lower coefficient of friction
- ✦ Reduced drag
- ✦ 8-10 times wear life over rubber

### 6" ESB

Width	Thickness	Item Number for 20'	Item Number for 50'
