

Eagle Spray Bar

GET THE **EAGLE EDGE!**
MADE IN THE U.S.A.

The Eagle Spray Bar is designed to dislodge carryback embedded in the belts surface to improve belt cleaning. Spray nozzles are located every six inches with a 45 degree high pressure spray pattern. Dislodging the carryback makes belt cleaning easier and extends your blade life. All components are powder coated. Mounting blocks are provided to let you position your spray bar to desired angle with easy mounting. The mounting blocks will also attach to our standard secondary cleaner without the need of fabricating a custom bracket. The fitting will accommodate a standard water hose connection.

IT'S THAT SIMPLE

Easy Installation (installation instructions included)

- Low maintenance
- Mounting blocks included
- Longer blade life

Mounting brackets are not included.
SEE BRACKET OPTION

Our Eagle Spray Bar comes pre-assembled
